

PLACEMAT WITH PROTECTIVE BUMPER AND ACCESSORY RESTRAINT SYSTEM

ABSTRACT: A placemat designed to provide a padded, sanitary surface off which a child can eat while also providing an accessory restraint system. The placemat consists of a cleanable mat with a bumper, frictional backing and loops used to attach accessories, all of which attaches to a horizontal surface by way of adjustable arms and pins, screws and grips. The placemat is completely portable and easily attaches to tables of varying thicknesses and shapes.
